Console Connect Live Internet Video Exchange

## Make content delivery and live streaming effortless with Console Connect

Console Connect Live Internet Video Exchange (LIVE) is the simpler, smarter way to deliver your content and live streaming globally.

Console Connect LIVE is a cloud-based IP media transport platform that has been specially developed to meet the ever-increasing demands of the media industry.

The platform gives you complete control over the end-to-end delivery and performance of your content – using a global network infrastructure that you can trust.

Seamlessly deliver live streaming or distribute content to your authorised agents in just a few clicks.

Manage all your live events coverage and content distribution through our self-service portal, or integrate via API.
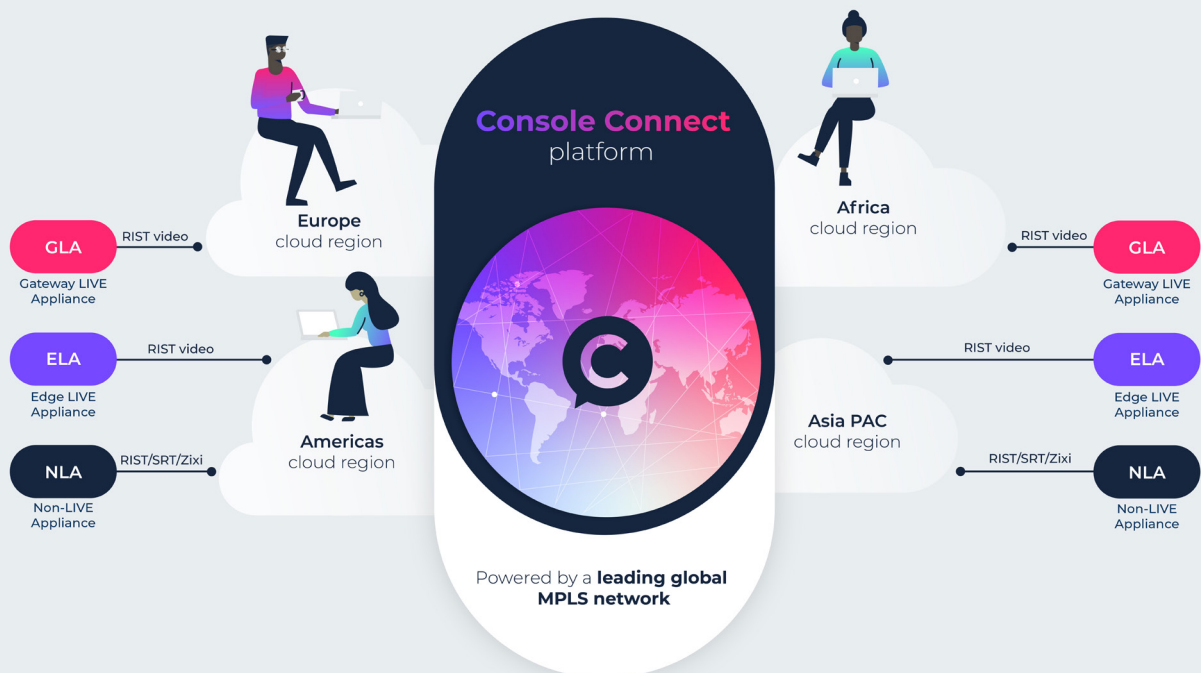

Why choose
Console Connect LIVE?

Enhanced performance

High-quality, low-latency routing for global content acquisition and distribution.

Global reach

Console Connect LIVE leverages our own global backbone to ensure your content reaches target destinations worldwide.

Better control

Manage all your live media workflows through a single portal. Monitor the end-to-end performance of your live streams.

Greater security

Full protection and encryption on all your content distribution and live streaming.

A media community at your fingertips

Connect with other media partners through the platform to share and exchange content.

More flexibility

Only pay for the content distribution services that you use.
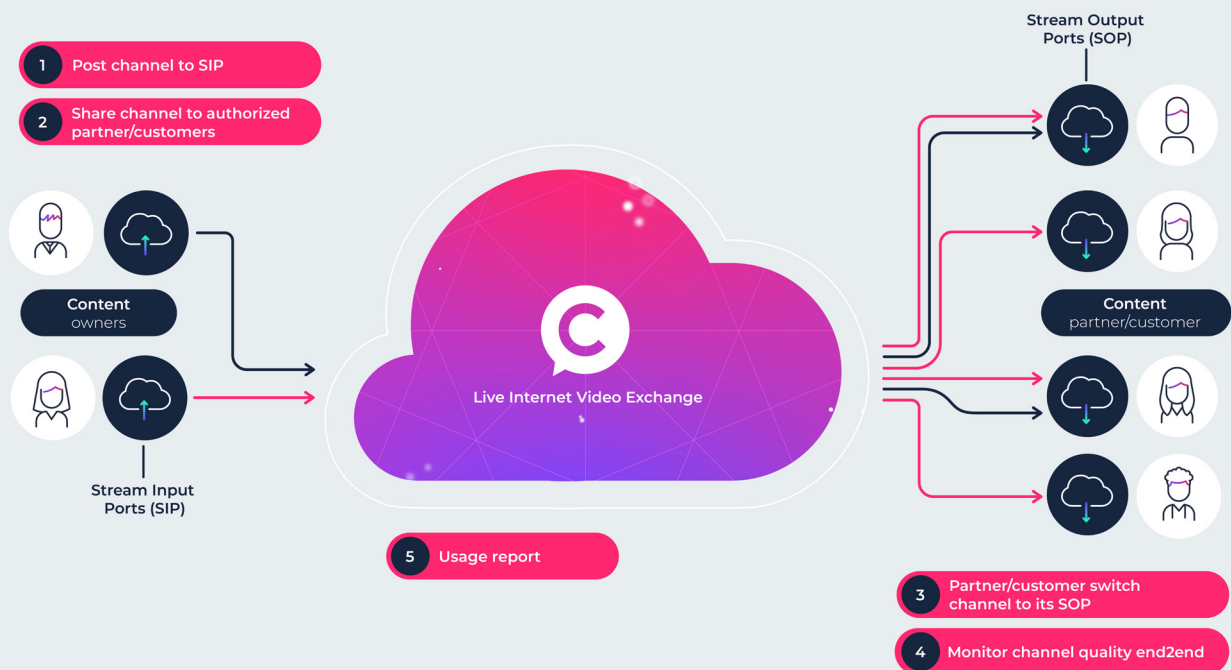

Increased resiliency

Our high-availability network infrastructure is the most reliable and consistent way to deliver content. Backed by our industry-leading SLAs.

How
Console Connect LIVE works

- Console Connect LIVE enables secure content acquisition and delivery on any major transport protocol.

- An open distributed platform with broad protocols support.

- With cloud-based video nodes set up across global regions, we support all major retransmission protocols (RIST, SRT, Zixi, etc.) and transport protocols (UDP, RTP, RTMP, etc.).

- Or integrate with third-party applications; readily adaptable to your media transport convention with a customised solution that offers high availability and resilience.

- Our intuitive visualisation dashboard includes thumbnailing and video preview to give you complete control of your media workflow from source to destination.

- Features advanced live transport monitoring metrics (ARQ retransmission statistics, TR-101 290 measurements, MPEG-TS stream information).
