

Connect digital ecosystems with enhanced speed and performance **with Wasabi and Console Connect**

What is **Console Connect**? —

Console Connect is a leading **Network-as-a-Service (NaaS)** platform that makes it simple for businesses to securely interconnect clouds, applications, devices, data centers and office locations. Unlike other NaaS offerings, Console Connect runs on its own underlying global network infrastructure.

This means customers get access to a best-in-class global private network, with extensive reach to more than 50 countries worldwide. Console Connect also provides an assured quality of service that is backed by industry-leading SLAs.

Through an intuitive, easy-to-use management portal, customers can order, change and manage their network connections in real-time, with point and click provisioning. Or users can even integrate via API.

Wasabi hot cloud storage delivers **breakthrough economics and performance** —

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is **80% less expensive** and is **faster** than first-generation cloud vendors.

Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests.

Wasabi keeps all data “hot” so it can be accessed in milliseconds. All Console Connect and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

Why Console Connect and Wasabi are better together? —

As the quantity of data being generated continues to grow exponentially and mission-critical information and applications are deployed at the point of demand, Console Connect and Wasabi provide new levels of **flexibility, agility and performance**. Accelerate, simplify and assure business cloud strategy with out-of-the-box, cost-effective, highly performant cloud storage, secured end-to-end, from Wasabi and Console Connect.

By connecting Wasabi's high performance hot cloud storage capabilities across the world's largest Software Defined Network, owned by Console Connect, organizations can instantly unlock new levels of performance across **fully secure, uncontended connectivity**. All of this delivered with **cost benefits**, thanks to Wasabi's predictably priced storage services and Console Connect's ability to reduce ingress and egress fees when moving data between clouds.

Console Connect and Wasabi also provide a **secure, compliant solution** with private connectivity so organizations can keep their sensitive data safe, and from all major clouds to Wasabi hot cloud storage, knowing exactly where your data goes and that only you are able to access it.

In just minutes, it is possible to spin up Wasabi cloud storage and weave it seamlessly into multi-cloud deployments with private Software Defined Cloud Interconnections®, delivered on-demand and with simple, predictable, pay-as-you-go pricing models.
