

# Managed Ethernet Hub

The all-in-one port solution for delivering Console Connect services.

## Manage multiple customers and services over a single port

Console Connect's Managed Ethernet Hub offers a more cost-effective and efficient way for you to deliver and resell Console Connect services. Rapidly deploy multiple customers and on-demand connectivity services via a single Access Port within a data centre or enterprise building - which means no more investing in multiple ports for individual customers.

- **Reduce your Access Port spend:** A single Ethernet Hub offers dedicated access to Console Connect for up to 48 ports per Ehub.
- **Rapid deployment:** Easily add more customers and scale services via a single Access Port.
- **Flexible:** Choose from a range of commercial models that best suit your business requirements, including a monthly subscription or guaranteed annual spend.
- **Greater choice:** Access a full range of award-winning on-demand connectivity services, including connect to cloud, data centre interconnection and internet access.
- **Build your own carrier-grade SDN platform:** Deploy Ethernet hubs at multiple sites and build your own fully branded platform using Console Connect Private Label.
- **Global reach:** Available across 50+ countries, enabling you to seamlessly expand services and support customers worldwide.

# How it **helps you** —

Whether you're an enterprise or a network provider, MSP, SI and data centre partner, our Managed Ethernet Hub solution accelerates your time to market with a fully automated, management and provisioning platform.

**Gain a competitive edge:** Stand out in the market through a full NaaS offering, backed by a compelling commercial model.

**Deliver revenue growth:** Build and deliver new products for your customer to unlock new revenue streams.

**Joint sales enablement:** We provide full onboarding and sales enablement to help you and your customers get the most out of Console Connect.

**Stringent SLAs:** All our services are backed by carrier-grade SLAs, covering uptime, latency and jitter. Your Ethernet Hub is also backed by a 24x7x4 SLA.

**Dedicated partner support:** All our resellers receive 24x7 support from our dedicated global support team or real-time online chat.

# Available services via your Managed Ethernet Hub

Our award-winning, carrier-grade connectivity services are flexible, secure and designed to meet the long-term needs of your business and customers:

**Internet On-Demand:** Resell carrier-grade internet access to your customers. Our service is available on-demand and delivered via a Tier 1 IP network (AS3491) that is consistently ranked in the top 10 globally. AS3491 is one of the only IP networks that has direct in-country private peering with leading cloud providers such as AWS and Google Cloud.

**Connect to cloud:** Privately interconnect to over 250 cloud locations worldwide. Use Console Connect to create private Layer 2 connections from your customer's data centre or enterprise location and public cloud provider. Manage their direct cloud connections via our web portal.

**Data Centre interconnection:** Seamlessly interconnect between 1,100+ data centre locations across 60+ countries worldwide, leveraging our private global resilient network. For data centre partners, this presents a unique opportunity to extend your connected ecosystem and network reach.

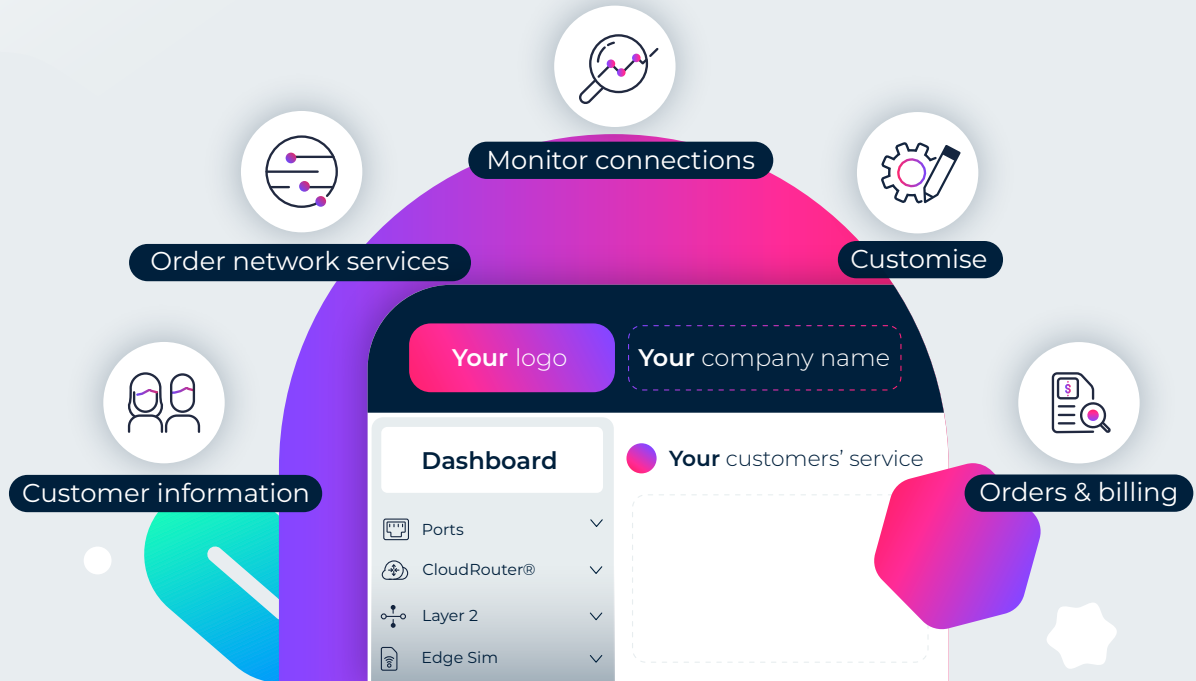

**Layer 3 CloudRouter®:** Our unique multi-cloud solution enables you to dynamically route customer traffic between multiple clouds, devices, data centres and other network end points. Different tiers of Class of Service available.

**IX-as-a-Service:** Resellers have full access to the Console Connect IX ecosystem, which include DE-CIX, AMS-IX, LINX. Deliver effortless and cost effective remote peering with access to leading Internet Exchanges globally.

# Take your reseller journey to the next level —

Bundle your Managed Ethernet Hub with Console Connect Private Label to resell or deliver a full suite of on-demand connectivity services under your own brand.

Console Connect Private Label is a fully hosted, dedicated SaaS management platform that empowers you to:

- **Quote and price connections**
- **Create individual dashboards for customers or business units**
- **Instantly provision and manage services**
- **Monitor revenue per customer**

Gain real-time insights over service status and performance metrics, and gain a greater understanding of your customers' networking needs.

# What's included in your Managed Ethernet Hub service

- Managed hardware rental, installation, and maintenance - backed by a global 24x7x4 SLA
- Comprehensive monitoring and lifecycle management
- A range of PartnerConnect program benefits with competitive reseller pricing

## Package components

**Hardware:** Choose from two Cisco EHub packages

- A Cisco Switch package that supports up to 4x10G uplink or 20G diversity.
- A Cisco Switch package that supports 4x100G uplinks or 200G diversity.

**Management:** In-band and out-of-band management access.

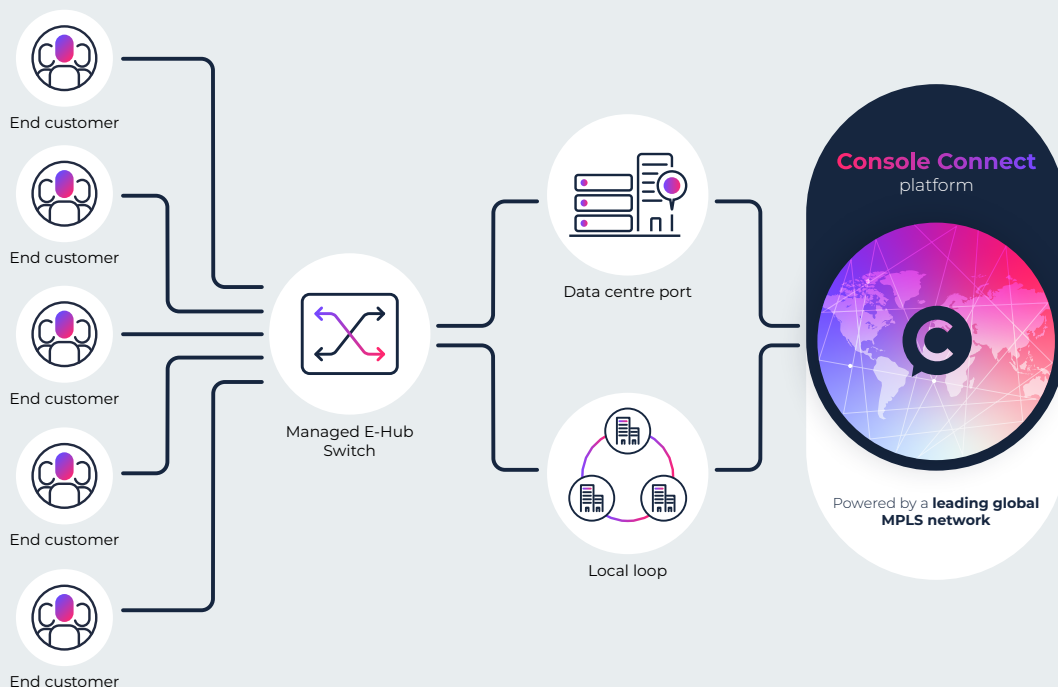

**Service Level Guarantee:** 99.5% availability; and a commitment to provide on-site support within 4 hours to resolve hardware faults.

**Connectivity:** Connect either at a Console Connect enabled data centre or via a carrier-grade cross connect to an off-net data centre or enterprise building. Available in multi-10G or 100G.

**Monitoring:** 24/7 real-time monitoring of switch and local loop performance.

**All available on-demand:** Managed Ethernet Hub is fully integrated with Console Connect, which means a user can activate ports and provision multiple services per port via a single management platform.
